Commercial Food Waste Recycling

Sunshine Composting & Organics can help dramatically reduce your disposal costs while employing sustainable, environmentally sound business practices and providing a credible closed loop solution with our Commercial Food Waste Recycling services.

Commercial Food Recycling rates are typically lower than regulated garbage rates for restaurants, grocery stores, coffee shops, institutional cafeterias, school kitchens, hospitals, senior living communities, and businesses that generate organic waste and they are NOT subject to the State of Washington Refuse Tax.

Food waste that previously went to a landfill or was incinerated will now be converted into registered organic rich compost (soil amendment), which is not only good for the earth, but good for your bottom line and good news to share with your customers. Better for the environment. Better for business.

Sunshine Composting & Organics offers recycling assessments and on-site training at no charge to help identify food and other waste eligible for recycling and calculate the financial benefits of diverting recyclable food waste from the garbage.

It's Easy:

We provide you with a distinguishable Commercial Compost container with yellow lids and secure lock bars to insure safety and product integrity. Just put food waste, spoiled, leftover bakery, dairy products, plant and vegetable trimming, paper, even waxed cardboard and other natural and organic approved materials in the clearly marked Compost container. We provide listings of what can and cannot be put in the food waste container for every department (see our website at www.sunshinedisposal.com for details) Sunshine will then empty your container on-site weekly, or arrange a schedule to meet your specific needs.

Accountable:

At Sunshine Disposal & Recycling, we follow environmentally sound practices and are fully compliant with all local, state and federal regulations. Our recycling services are audited by the Washington Utilities and Transportation Commission (WUTC) which is your assurance that all materials are recycled in accordance with industry standards.

Comprehensive Disposal & Recycling Solutions

Let Sunshine Disposal & Recycling, a locally owned and operated company serving Eastern Washington and North Idaho for nearly 100 years, meet your total waste disposal and recycling needs. As the most responsive, innovative and experienced refuse and recycling business in the Northwest, we can provide expertise in designing the most efficient and affordable solution for all of your project needs.
